Party & Disco Guide

Where to begin...

When you book us for your event we will need to know a few important details in order to give you an accurate quote and make sure we take the correct equipment:

- The date, start and end times for the event
- The rough number of people that will be attending
- The name and/or size of the venue.
- A list of around ten (or more) of your favourite songs to gain an idea of the style of music you will require.

Once we have an idea of the type of event you are going for we will visit the venue and conduct a survey (unless we already have it on file) in order to give you the most accurate quote with the most appropriate equipment for your event.

We will then make a recommendation based on this information and cater for your needs.

In order to confirm the booking we will send you a booking form to complete and you're ready!

The Music...

If you choose to hire the complete disco with a DJ you can rest assured that our DJ's are reliable and have plenty of experience.

We have an extensive range of music and are willing and able to play anything that you and your guests want to listen to. This is strengthened by the list of songs you provided to us and we guarantee to have all of these songs on the night.

The sound...

In order to make sure that everyone enjoys the music at your party we will take the appropriate amount of high quality 'PA' loudspeakers to make sure that the music can be heard and enjoyed by everyone.

You are completely free to specify the amount of PA you require or just let us use our experience to recommend the amount you're likely to need.

The Lights...

Our aim at all of our events is to try and create as much of a 'nightclub' atmosphere as possible, regardless of the venue. As such we use professional high quality lights, which really help to transform the room.

The usual type of lights that we use are 'dichroic moonflower effects lights'. This basically means a number of bright beams of light that move around the room changing pattern and colour in time with the beat of the music.

If you have a bigger budget, however, there are a lot of options available that are guaranteed to have a major impact on your guests! We can give details of these options upon request.

To back the lights up, we use smoke machines wherever possible* as these make the light much more visible and amplifies their impact for the audience.

*Use of smoke and bubble machines is dependent on the type of smoke detectors and the rules of the venue, to which we are bound to adhere.

Optional Extras...

We are dedicated to providing sound and lighting equipment and the management of this technology for as many different people as possible. As a result we can offer a range of loudspeakers and lighting with an excellent DJ for parties, venues etc. We are also able to provide a variety of equipment for all sizes of live bands.

Since we began we have been continually expanding our services and upgrading our equipment base in order to provide as many services 'in-house' as possible, so that our clients are able to liase with just one company and achieve all of their needs.

Alternative services include:

Live bands – we can arrange for a live band to entertain your guests.

Powerful outdoor lighting – allowing you to make safe use of outdoor areas and create features of gardens and ponds.

Pyrotechnics – an extremely dramatic feature for any event, allowing you to have powerful stage effects as well as more subtle 'confetti cannons' to shower your guests!

Laser lighting shows – make your party into a stunningly unique event with laser lights dazzling the crowd.

Please note that some of the equipment we use requires a very large supply of power and we will have to be assured that this will be available for the event.
